2. Interaction with the physical environment

Animal-based indicators				Animal Welfare (Pigs) Code of Welfare 2010
- Vocalisation / noise				Minimum Standard No. 7 - Temperature Ventilation control or other measures must ensure housed pigs do not become overheated or cold stressed
- Physical appearance				
- Behaviour				Minimum Standard No. 8 – Air Quality (a) Adequate ventilation must be provided in order to prevent the build-up of dust, and gases such as ammonia, to levels that are harmful to pigs (b) Immediate and appropriate action must be taken to reduce ammonia levels if they exceed 25 ppm at pig level
- Mobility				
- Faeces				Minimum Standard No. 6 – Housing and Equipment (a) Housing systems must be designed, constructed and maintained in a manner that provides suitable (comfortable) temperatures, fresh air, and hygienic conditions. (b) All group housed pigs must be able to stand, move about and lie down without undue interference with each other in a space that provides for separation of dunging, lying and eating areas. (c) Omitted (growers only) (d) Inspection of all pigs must be possible. (e) The risk of injury, disease or stress for pigs must be minimised by appropriate design, construction and maintenance of housing and equipment. (f) Pigs must be provided with natural or artificial light of appropriate intensity for a minimum of nine hours each day. (g) All mechanical equipment used in pig production must be maintained in good working order. (h) Alternative means of temperature regulation, ventilation, feeding and watering of stock must be available in case of power or computer failure or mechanical breakdown. (i) Systems must be designed to minimise the impact of flooding in the event that water pipes or fittings burst. (j) Appropriate fire prevention measures and a fire emergency plan that includes feed milling areas adjacent to pig housing must be in place
				<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid black; border-radius: 10px; padding: 5px 15px; text-align: center;">OK</div> <div style="border: 1px solid black; border-radius: 10px; padding: 5px 15px; text-align: center;">not OK</div> </div>

Animal-based indicators

Animal Welfare (Pigs) Code of Welfare 2010

Recommended pen dimensions

Measurement (m)		At 150 kg	At 200kg
Length	- Lying area	1.6	1.85
	- Rump rail	0.2	0.2
	- Trough	0.3	0.3
Total Length		2.10	2.35
Width	- Floor level to 0.2cm	0.8	0.9
	- 0.2 to 1.0m above floor level	0.5	0.5
Bottom Rail	- Height from floor	0.18-0.22	0.20-0.25
	- Distance from draught barrier	0.30	0.30

Measured pen dimensions

Comments

Minimum Standard No. 10 – Managing Interactions between Sows and Piglets

- a) Accommodation for farrowing and lactating sows must be of suitable design and sufficient size to allow the sow to lie down at full length and without leg restriction.
- b) Support, such as barriers or sloping walls to lean against, must be provided for the sow as she lies down, and she must be able to rise and stand comfortably without undue risk of injury to her litter.
- c) When standing in a farrowing crate the sow must not touch both sides of the crate simultaneously, and her back must not touch any bars along the top.
- d) The farrowing system must provide an area to which the piglets can retreat when the sow moves.
- e) If sows are to be confined in farrowing crates before farrowing, it must be for no more than five days.
- f) If sows are to be confined in farrowing crates for lactation, it must be for no more than four weeks after farrowing.
- g) Notwithstanding (f), nurse sows may be retained in a farrowing crate for a further week for fostering purposes. This is conditional on no more than 5% of sows in any herd at any one time being retained as nurse sows.
- h) Sows, in any farrowing system constructed after 3 December 2010, must be provided with material that can be manipulated until farrowing.

OK not OK

Minimum Standard No. 5 – Shelter for Pigs Outdoors

- (a) Pigs must be provided with dry and draught-free but adequately ventilated shelter
- (b) Pigs must be provided with the means to minimise the effects of adverse weather, including the effects of heat and cold stress

OK not OK

Minimum Standard No. 9 Behaviour

Pigs must be managed in a manner that provides them sufficient opportunities to express and satisfy their normal behaviours. These include, but are not limited to, feeding, drinking, sleeping, dunging and urination, vocalisation, thermoregulation, and social contact

OK not OK

3. Health, injury and disease

Animal-based indicators	Animal Welfare (Pigs) Code of Welfare 2010
- Vocalisation / noise <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Minimum Standard No. 18 – Management of Health and Injury (a) The owner or person in charge must check pigs at least once each day for signs of ill-health or injury and must undertake timely preventative or remedial action as appropriate. (b) Those responsible for the care of pigs must be competent at recognising the signs of good health, ill health, or injury and must consult a veterinarian as appropriate. (c) Medication must only be used in accordance with registration conditions, and the manufacturer's instructions or professional advice. (d) Piglets must receive sufficient iron to prevent anaemia. (e) Contaminated bedding, faeces and urine must not accumulate to the extent that they pose a threat to the health and welfare of pigs.
